

AI-POWERED PERSONAL FINANCE PLANNER

Multi-Step Prompt Workflow for Personal Finance Planning and Budget Evaluation

Mini Assessment – Prompt Workflow Design

Name: Manavarthi SethuRayal

Regno:99230040133

1. Project Objective

The objective of AI-Powered Personal Finance Planner is to design a structured, multi-step prompt workflow that takes a person's income, expenses, financial goals, savings information, and planning requirements as input, understands the financial profile, analyzes spending and goals, evaluates priorities, identifies gaps, suggests improvements, and produces a concise personalized financial preparation report. The workflow is completed through prompts in an AI interface without building application code.

2. Problem Statement

People often find it difficult to understand where their money is being spent and how to organize a realistic plan for savings and financial goals. They may overlook recurring expenses, unnecessary spending, savings priorities, or the relationship between short-term and long-term goals. A single AI prompt may provide general suggestions, but it does not always provide a systematic process for understanding the financial profile, analyzing expenses and goals, measuring financial priorities, finding gaps, improving the budget, and preparing a practical action plan.

3. Workflow Architecture

INPUT → STEP 1 → STEP 2 → STEP 3 → STEP 4 → STEP 5 → STEP 6

Income + Expenses + Goals + Savings Information → Financial Profile Understanding → Income, Expense & Goal Analysis → Financial Match Evaluation → Savings & Budget Gap Assessment → Budget Optimization → Final Financial Preparation Report

4. Workflow Steps and Expected Outputs

STEP	PURPOSE	EXPECTED OUTPUT
1. Financial Profile Understanding	Extract income, fixed expenses, variable expenses, savings, debts, financial goals and planning preferences.	Structured financial profile with verified information.
2. Income, Expense & Goal Analysis	Break down income and spending into manageable categories and organize financial goals by priority and timeline.	Structured income, expense and goal profile.
3. Financial Match Evaluation	Compare the financial profile with the person's goals and evaluate whether current spending and savings support those goals.	Financial assessment, strengths, constraints and evidence mapping.
4. Savings & Budget Gap	Identify spending gaps,	Gap report, priority

Assessment	insufficient savings areas, debt considerations and practical budget issues.	recommendations and improvement areas.
5. Budget Optimization	Improve the budget while preserving the person's actual income, expenses, goals and constraints.	Optimized budget structure, savings allocation and practical suggestions.
6. Final Financial Preparation Report	Combine validated findings into a concise financial planning report.	Final assessment, priority improvements, savings plan, learning topics and action plan.

5. Detailed Prompt Design

STEP 1 — Financial Profile Understanding

You are a Financial Information Analyzer.

Analyze the provided financial information and create a structured personal financial profile.

Identify:

1. Monthly or annual income
2. Fixed expenses
3. Variable expenses
4. Existing savings
5. Debt or recurring financial obligations, if mentioned
6. Short-term financial goals
7. Long-term financial goals
8. Preferred savings priorities
9. Current budgeting habits or concerns, if mentioned

Financial Information:

[PASTE FINANCIAL INFORMATION HERE]

STEP 2 — Income, Expense & Goal Analysis

You are a Personal Finance Analyzer.

Analyze the financial profile and identify:

10. Income sources
11. Fixed and essential expenses
12. Variable and discretionary expenses
13. Savings patterns
14. Financial goals
15. Goal priority and timeline
16. Major spending categories
17. Important budgeting considerations

Do not add financial information that is not present in the supplied data. Return the analysis using clear headings and concise bullet points.

STEP 1 OUTPUT:

[PASTE STEP 1 OUTPUT HERE]

STEP 3 — Financial Match Evaluation

You are a Financial Goal Match Evaluator.

Using the financial profile from Step 1 and the analysis from Step 2, evaluate how well the current financial situation supports the stated goals.

Provide:

18. Overall financial-goal match score from 1–10
19. Strong financial areas
20. Spending or savings patterns that support goals
21. Missing or weak areas
22. Goal-to-financial-evidence mapping
23. Three highest-priority improvements

Base the evaluation only on the supplied information. Do not invent income, expenses, savings, debts or financial goals.

STEP 1 OUTPUT:

[PASTE STEP 1 OUTPUT HERE]

STEP 2 OUTPUT:

[PASTE STEP 2 OUTPUT HERE]

STEP 4 — Savings & Budget Gap Assessment

You are a Savings and Budget Gap Assessment Assistant.

Using the financial evaluation, identify the most important budgeting and savings gaps.

Evaluate:

24. Areas of excessive or unclear spending
25. Savings shortfalls relative to stated goals
26. Emergency-savings considerations
27. Debt or recurring-obligation considerations, if applicable
28. Categories that may need closer tracking
29. Practical ways to improve the budget
30. Three immediate actions to address the highest-priority gaps

Do not recommend unrealistic changes or invent financial facts. Clearly distinguish between observations, estimates and recommendations.

STEP 3 OUTPUT:

[PASTE COMPLETE STEP 3 OUTPUT HERE]

STEP 5 — Budget Optimization

You are a Personal Budget Optimization Assistant.

Improve the financial plan based on the previous analysis.

Preserve the person's actual income, expenses, goals and constraints. Do not invent income, assets, investments, debts or financial achievements.

Provide:

- 31. Improved monthly budget structure
- 32. Suggested savings allocation
- 33. Priority order for financial goals
- 34. Ways to reduce or control spending
- 35. Debt-management considerations where applicable
- 36. Simple tracking method
- 37. Formatting/content improvement suggestions
- 38. Explanation of how the changes address the identified gaps

PREVIOUS ANALYSIS:

[PASTE STEP 1, STEP 2, STEP 3 AND STEP 4 OUTPUTS HERE]

STEP 6 — Final Financial Preparation Report

You are a Final Financial Preparation Report Generator.

Using all previous analyses, generate a concise personal finance planning report.

Include:

- 39. Financial profile summary
- 40. Overall financial-goal match score
- 41. Top financial strengths
- 42. Main budget and savings gaps
- 43. Highest-priority improvements
- 44. Recommended financial learning topics
- 45. Savings and budgeting preparation topics
- 46. Optimized monthly plan
- 47. Three immediate action items
- 48. Simple progress-review checklist

Do not invent facts, financial statistics, returns, prices or guaranteed outcomes. Clearly distinguish between existing financial information and recommended actions.

6. Prompt Chaining & Information Flow

FROM → TO	PURPOSE
Step 1 → Step 2	Financial profile supports income, expense and goal analysis
Step 2 → Step 3	Financial analysis supports goal-match evaluation
Step 3 → Step 4	Match findings reveal savings and budget gaps
Step 4 → Step 5	Gaps guide truthful budget improvements
Steps 1–5 → Step 6	All validated findings become the final financial report

7. Demonstration Example

INPUT EXAMPLE

Financial Profile: A person has a regular monthly income, recurring household expenses, transportation and food expenses, existing savings, and a goal of building an emergency fund while saving for a future purchase.

Financial Requirements: The person wants to understand spending patterns, improve monthly savings and prioritize goals without making unrealistic changes.

Expected Result

A structured financial-goal match score, spending and savings strengths, budget gaps, practical recommendations, an optimized monthly budget structure and a focused financial action plan.

8. Expected Learning Outcome

This workflow demonstrates how prompt engineering can decompose a complex personal-finance planning task into manageable AI interactions. It highlights sequential prompting, contextual reuse, structured evaluation, gap analysis, iterative improvement and final content generation without requiring software development or code.

9. Responsible Use

- AI-generated financial suggestions should be reviewed carefully and should not replace qualified financial advice when professional advice is needed.
- Financial calculations and important decisions should be verified using reliable records and appropriate sources.
- Users should avoid sharing unnecessary sensitive financial information.
- AI should not be treated as a guarantee of financial outcomes.
- Personal judgment and responsible financial planning remain necessary.

10. Conclusion

AI-Powered Personal Finance Planner transforms financial information and personal goals into a structured, evaluated and actionable preparation plan through six connected prompt stages. By separating financial-profile understanding, income and expense analysis, goal matching, gap assessment, budget optimization and final reporting, the workflow provides a clear, professional and reproducible approach to AI-assisted personal finance planning.
